SKILLS

- Frontend: Javascript, Typescript, React, Next.js, Tailwind, CSS, HTML, Framer Motion, Zustand.
- Backend: Javascript, Typescript, Next.js Node.js, Express.js.
- Database: MongoDB, PostgressSQL.
- Tools: Git, GitHub, Vercel, Render, Figma, Postman, Cloudinary.
- Other: RESTFUL APIs, Cross-Browser Compatibilty, Agile methodology

PROFILE

Full Stack web developer with two (2) years of expertise in creating user-focused web applications. A software engineer who is passionate about what he does. Knowledgeable with contemporary web technologies such as React, Nextjs, Javascript, Typescript etc. Skilled at working with cross-functional teams to bring solutions that are high performing, responsive and optimised. Devoted to maintaining current knowledge of market trends and enhancing technological proficiency on a constant basis

WORK EXPERIENCE

MYTEACHER SERVICES 03/2022 - 2024
Frontend Developer

- Developed and maintained web applications using React.
- Developed APIs and web services .
- Optimised applications for performance and scalability.
- Integrate third party services and APIs.

IKEFIX DIGITAL LIMITED 04/2024 - PRESENT
Senior Full Stack Frontend Developer

- Developed custom themes and designs from scratch, adhering to best practices and web standards.
- Assisting in troubleshooting front end bugs for effective and efficient application running.
- Created and connected strong APIs that connected with our frontend securely
- Handled the company's authentication and authorisation system build strong scalable security system
- Work closely with project managers to prioritize tasks to meet project deadlines

EDUCATION

Bachelor of Science in Marketing 2019-2023
University Of Port Harcourt

PROJECTS

● Chat App | <https://chat-app-lb4r.onrender.com>

- Built a real time chat app with react for the frontend, node.js and express for the backend, mongodb for database and data storage
- Implemented JWT-based authentication and authorization for secure user sessions.
- Integrated Socket.io to enable bi-directional communication and instant message updates.
- Optimized message handling and UI responsiveness for seamless real-time chat performance

● Music Streaming App | <https://music-streaming-app-2.onrender.com>

- Developed a full-featured music streaming web app using React, Typescript, Node.js, Express, and MongoDB.
- Implemented music playback, playlists, and song search with a dynamic and responsive UI.
- Built backend APIs for user data, tracks, and playlists, ensuring efficient data flow across the stack.

● Social Media | <https://social-media-app-nextjs-gxyy.vercel.app/>

- Built a social media web application using Next.js for server-side rendering and React for dynamic client-side interactions.
- Implemented user authentication, profile management, and post creation with integrated APIs
- Implemented user authentication, profile management, and post creation with integrated APIs
- Designed a responsive, fast-loading UI with seamless navigation and optimized performance for scalability.

● Product Store | <https://product-store-qcmk.onrender.com>

- Built a full stack product store application using React for the frontend, Node.js and Express for the backend, and PostgreSQL for database management.
- Designed and implemented RESTful APIs for product creation, retrieval, updating, and deletion.
- Integrated responsive UI components with efficient state management and API data handling
- Focused on backend logic, database schema design, and secure communication between client and server.
